### Objective OR Summary:

Use an **objective** if you are a current student, recent graduate or new professional. An objective should focus on three ideas: The position you are seeking, which industry or environment you prefer and which skills you are bringing to the company or organization. Use a **summary or professional profile** if you have several years of full-time professional experience. Both serve as the equivalent of your "elevator pitch," succinctly presenting details of your background, strengths, most marketable skills and important personality traits.

### Education:

List the colleges you have attended in reverse chronological order, the current or most recent being first. Include the name of the college, location, graduation date or expected graduate date, degree and GPA if 3.0 or above.

### Honors or Awards (pick one; optional section):

This includes a scholarship or other recognition.

### Related Coursework or Projects (optional section):

Use this section if you have projects or classes that relate to the internship or job for which you are applying. This enables the reader to literally connect your studies to the job. Leave out intro classes and class numbers.

### Skills:

List relevant computer, language, software, technical or interpersonal skills.

### Related Experience:

This section is for any experience **related** to your major, career goal, volunteer experience or academic course projects.

Company Name, City, State

Dates Worked: Month, Year

Title, Department (when possible)

- Use accomplishment statements when possible.
- Begin with action verb: What did you do? How did you do it? What were the results?
- Can you quantify results with numbers or a percentage?

### Leadership (optional section):

### Other Employment:

This section is used for jobs unrelated to the industry you are interested in; employers want to see that you have worked in some capacity. Descriptions of these jobs may not be needed depending on the amount of room you have, but do include dates of employment. See format below. Place one job on each line.
